PickaPalm by Hottrix

Version 1.6

Dear customer

Thank you for your interest in PickaPalm™ 1.60.

You have successfully downloaded and unzipped PickaPalm™.

Below you will find the brief introduction to the product.

We will not disclose how the effect is achieved but reading below information will sure demonstrate how strong this effect is!

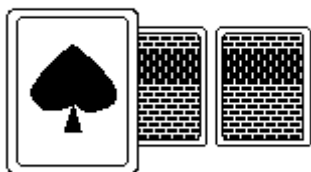

Register now and immediately receive the full version including an elaborate 15 page tutorial, free updates and many more benefits.

What is PickaPalm?

PickaPalm™ is the world's first original magic trick for the Palm Pilot™.

Without even looking at your (or your friend's) Palm Pilot™ you will always know, what your spectator is thinking! And: No, you're not touching the device either...

PickaPalm by Hottrix.com

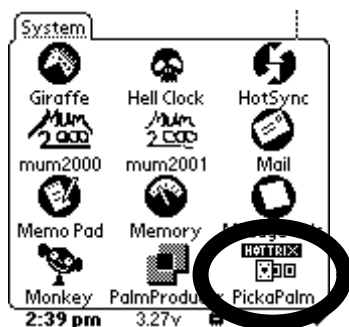

Not only is PickaPalm absolutely amazing but also it's very easy to perform.

For once it's true: No practice required.

Best of all now you can always carry a stunning magic trick with you without setup and angle problems...

The coolest part?

If your Palm Pilot™ supports infra red beaming you can actually perform this miracle on you friend's or colleague's Palm Pilot. Imagine their total amazement when you read their minds with their very own Palm without ever having touched the device!

Installation:

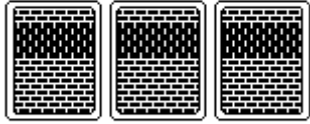

Install PickaPalm on your Palm Pilot just like any other application you normally install via the Palm Desktop™. If you are installing a new version you do not have to remove the old version. PickaPalm will overwrite the old (or unregistered) version. Perform a HotSync™ which loads PickaPalm onto your friendly little handheld. If you need help with this procedure kindly refer to your Palm Pilot user manual or visit our member zone for registered Hottrix members on

www.hottrix.com

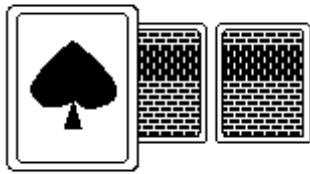

Let's do some magic:

You will immediately see the PickaPalm™ icon when you start your Palm Pilot™. Click on it, read the little info and press OK.

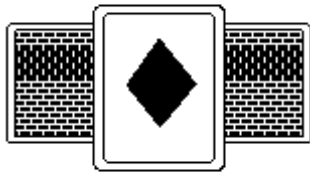

PickaPalm by Hottrix.com

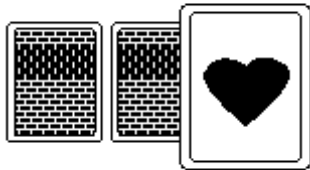

You will see three face down cards. Tap on any card and it will turn over revealing its suit. That's right: They are three different aces. The cards turn face down again by clicking them once more or by simply clicking another card. It's very intuitive, really.

You will also notice, that each time you flip a card over it will have changed places. This means: The cards are always in a different location. This auto-shuffling will add a lot to the effect because it disables the theory, that you may have memorized a certain sequence...

Hand the Palm Pilot™ to your spectator and let him see the 3 cards for himself. Let them fiddle around. There's nothing that can go wrong. There are no sequences or timed events. No secret buttons to push either. Just let them get the funny feel of the cards turning over and back.

Now get dramatic and tell them to hide the Palm Pilot™ from you. They can even give the Palm Pilot™ to another spectator just so nobody thinks you are working with stooges.

You NEVER touch the device!

Turn your back towards your audience and tell your spectator to turn a card over.

The spectator has an absolutely **free choice** of any of the 3 cards. His pick will **not** always be **the same card!**

Now tell them to turn the card over again so its face is hidden. You can even tell them to hide the Palm Pilot™ altogether.

Turn around and look your spectator in the eye.

You will now declare **the exact card your spectator chose** (any of the three suits are possible!).

Success is guaranteed: Whatever their choice; You will know. Not by eye, not by ear, not by touch. By PickaPalm...

Oh, and should you stumble upon a very curious spectator who won't give your Palm Pilot™ back after the trick: No problem. Let them fiddle with the cards: They are all different! Should you want to repeat the effect you won't have to touch the device. It will most probably be a different card this time.

And you will know!

How it's done? What's the secret?

It is none of the below possibilities!

- 1 Guess (odds are 1:3)
- 2 Transmit/receive code (Infra Red solution, stooge, code on screen, acoustics etc.)
- 3 Sequenced Event (after turning the hearts over, the spades would be next etc.)
- 4 Timed event (waiting for 5 seconds would make any next card to be hearts...)
- 5 Secret button (would make all cards the same at next pick)

You will not...

- ...touch the Palm Pilot
- ...listen to the Palm Pilot
- ...look at the Palm Pilot to see what the selection was

You can...

- ...repeat the effect (always different card)
- ...hand out Palm Pilot for inspection
- ...be in a different room, even blindfolded if you need that much drama...

This version DOES NOT reveal how the effect is achieved, however all the above effects can be performed with the full version of PickaPalm.

Register your PickaPalm on www.hottrix.com and we will let you have a beautifully detailed 15 page manual for this great trick including lots of psychological tips, hints and a full performance script as well as the most recent updated version of PickaPalm.

All downloadable and instant.

Registration is super easy and www.hottrix.com will guide you through every step on your way to becoming a licensed PickaPalm™ magician.

Trust us: It's worth it!

Please understand, that you are not buying just software. You are purchasing a quality magic effect from a well established manufacturer/distributor of magic tricks and special effects for the film and stage industry. The price in this industry is determined by the amount of originality, ability to entertain and amaze as well as the in-depth tutorial information provided along with the effect. You are purchasing a truly amazing secret.

The price is \$19.95 and includes detailed illustrated 15 page manual, updates for 1 year as well as access to our member zone for additional information, videos and online manuals.

We are famous for our fast and extensive online support so sure: That's included, too!
